

Olanrewaju Adeniji

Cloud Engineer

Website: [Portfolio](#)
Email: lanreadeniji77@gmail.com
Contact: (+234) 7067576316
Location: Lagos, Nigeria.
Social Media: [Larry-init\(Github\)](#) / [Olanrewaju Adeniji](#)

SKILLS

Cloud: AWS (ECS, EC2, Fargate, Lambda, CloudWatch), Azure, GCP
Infrastructure as Code: CloudFormation, Terraform, Ansible
Orchestration & Containers: Kubernetes, Docker, ECS, Azure Container Apps
CI/CD & Automation: Jenkins, Ansible, GitHub Actions, AWS CodePipeline, Bitbucket Pipeline, Harness, Azure DevOps
Observability: Datadog, Prometheus, Grafana, ELK Stack, CloudWatch
Languages: Python, JavaScript, C++, C#, Bash, TypeScript, Java
Core Competencies: Incident Management, On-Call Operations, Capacity Planning, Disaster Recovery, SLO/SLI Management
Miscellaneous: Data Structure, Algorithms, SQL, Git, Linux, Bash, Scripting, Computer Vision, Networking, Server Administration.

EXPERIENCE

Moniepoint Inc. (Team Apt) | Cloud Engineer: Remote, [\[Moniepoint\]](#) MAR. 2026 - PRESENT

- Deploy applications on AWS services such as ECS, EC2 and EKS with an application availability of 99.99%.
- Collaborate with a team of engineers to maintain site infrastructure with the application of tools such as Datadog, ELK, Prometheus and Grafana for monitoring, observability, logging and alerts for servers and services to ensure system availability and reliability.
- Contribute to the development and implementation of disaster recovery plans, resulting in seamless business continuity during maintenance or unexpected outages by ensuring systems are utilizing cloud best practices.

Interswitch Group | DevOps Engineer : Lagos, NG [\[Interswitch\]](#) NOV. 2025 - MAR. 2026

- Designed, operated, and optimized highly available Kubernetes platforms supporting mission-critical financial applications, while leading root-cause analysis and remediation of production incidents across Kubernetes, Linux/Windows infrastructure, and CI/CD platforms.
- Built comprehensive platform observability and security capabilities using Grafana, Prometheus, Loki, and HashiCorp Vault, enabling proactive incident detection, centralized secrets management, and improved operational visibility across cloud and on-premises workloads.
- Automated infrastructure and application delivery using Terraform, Jenkins, Bitbucket Pipelines, and SonarQube, standardizing AWS/Cloudflare provisioning and CI/CD workflows while improving deployment consistency, code quality, and release reliability.

Nigeria Interbank Settlement System Plc. (NIBSS) | DevOps Engineer : Lagos, NG [\[NIBSS\]](#) JUN. 2022 - OCT. 2025

- Designed and automated CI/CD pipelines for 50+ applications, reducing deployment time by 90% and improving production release reliability.
- Supported secure integration of financial institutions into Nigeria's national interbank payment infrastructure, while containerizing microservices with Docker/Kubernetes to improve scalability and reduce deployment-related outages by 70%.
- Built observability and automation solutions using Terraform, Prometheus, Grafana, ELK, and Python, reducing manual configuration and eliminating 240+ hours of repetitive operational work annually.

Nupat Technologies | Software Engineer: Lagos, NG [\[NUPAT\]](#) MAR. 2021 - JUN. 2022

- Built RESTful APIs and backend services using Python, FastAPI, Node.js, and SQL-based databases, with emphasis on clean architecture, performance, and maintainability.
- Designed and developed scalable, production-grade applications for clients, translating business requirements into secure, maintainable, and high-performance software solutions.
- Designed and maintained CI/CD pipelines to automate build, testing, and deployment processes, reducing manual release effort and improving deployment reliability.

Skytex Ltd. | Software Developer: Lagos, NG MAR. 2020 - APR. 2021

- Developed and deployed responsive web applications across Windows Server environments, ensuring reliable and optimized application delivery through IIS.
- Automated Linux and Windows server configuration using Ansible, improving deployment consistency and operational efficiency.
- Collaborated with development teams and end-users to troubleshoot technical issues, ensure compatibility, and improve solution reliability.

Federal Radio Corporation of Nigeria | Systems Engineering Intern [FRCN]: Ibadan, NG [\[FRCN\]](#) JUN. 2018 - AUG. 2018

- Supported the installation, configuration, and maintenance of network infrastructure, structured cabling, patch panels, and broadcast systems across studio and data room environments.
- Assisted engineers with troubleshooting and maintaining RF, communication, and digital broadcast systems, including Outside Broadcast (OB) setups, to ensure reliable operations during live programmes.

PROJECT

Enterprise Application Migration from VMware to Hyper-converged Infrastructure

Led the migration 50+ enterprise microservice applications from VMware infrastructure to Nutanix (Hyper-converged Infrastructure) Reduced infrastructure management complexity while improving scalability and operational resilience.

EDUCATION

Ahmadu Bello University, Zaria — Master in Information Management OCT. 2025 - SEPT. 2026

University of Lagos — B.Sc Electrical and Electronics Engineering NOV. 2015 - DEC 2019

- Member of the Andela Learning Community, Data Science Nigeria, Microsoft Tech Community(MSPs) & Google Developers Group(GDG).

COMMUNITY ACTIVITIES AND AWARDS

AWS Certification — Solutions Architect Associate ([AWS Certified Solutions Architect Associate](#)) JUL. 2024 - PRESENT

Microsoft Azure Certifications — AI ([AI Fundamentals](#)) MAY. 2024 - PRESENT

Hashicorp Certification — Terraform & Vault Associate ([Terraform, Vault](#)) AUG. 2024 - PRESENT

COBIT 2019 FOUNDATION MAR. 2025 - PRESENT
